The Human-in-the-Loop Safeguard In the UAE executive landscape, fully autonomous bots that push automated links feel disrespectful to high-status leaders. Our architecture uses automation only to triage and qualify. The moment an executive reveals her challenge, the system initiates the audio handoff, prompting Eman (or our trained concierge) to send a warm, personalized 45-second Arabic voice note. This preserves 100% of the luxury human touch.	CRITICAL IN THE GCC
